**Language:** English

### Objective

In the Digital 21 consultation paper of 2006, the Administration has highlighted the application of IT in healthcare delivery in Hong Kong as one of the key areas of service transformation to enable the next generation of public services. This Forum aims to bring together the policy makers from the Government and Hospital Authority, healthcare professionals, community care providers, ICT industry players and professionals to:

- understand the current status, future development direction, opportunities and challenges of health IT and Electronic Health Record (eHR) in Hong Kong,
- conduct in-depth discussion on how a community-wide strategy and broad-base support can be formed to support health IT in Hong Kong, and
- explore opportunities for maintaining regular dialogue and future collaborations between the ICT and healthcare sectors.
